

I made an E-2 investment on September 10, 2018, establishing my Green Truck company. My visa, along with my wife's and daughter's visas, were issued on September 27, 2018.

My investment was \$250,000 which was put to work in November 2018. I began with six trucks providing a monthly cash flow of \$10,900.

At the end of 2022, with Green Truck's help, we have put 31 trucks on the road and my capital account balance exceeds \$306,000. My present monthly cash flow is \$11,600. While in 2022 it seems that many other kinds of investments suffered, the return on my Green Truck business investment with the help of the professionals at Green Truck was 7.7%. I am happy with that.

Green Truck has provided me with the training, tools, licenses, and consultations to run my business efficiently and effectively. The Green Truck staff handles day-to-day operations and provides vital information and reporting to assist me in growing the company and maximizing my returns.

Green Truck has proven invaluable in providing professional assistance and expertise in many aspects of the business in which I was unfamiliar, communications with fleet members, customer service, insurance, collections, and much more.

I am very satisfied with the decision to invest through the E-2 Program with Green Truck. I have enjoyed operating my Green Truck business and have enjoyed life in the U.S. Everything worked out as I had hoped.
