

In May 2015, my wife and I launched our Green Truck business - Green Truck Zhang, LLC.

Our E2 visa was approved in August of 2015. We renewed our E2 visa for another five years in 2022.

My wife is the principal E2 visa holder, I have an open market employment authorization and our daughter can attend school at in-state tuition rates.

We started our business with three operating trucks which we acquired from Green Truck for \$148,000. Those trucks immediately provided cash flow of \$4,000 per month.

Over the past eight years, Green Truck has helped us re-invest our cash flow into 23 different trucks - primarily engaged in long haul freight transport.

Owner operators from our current fleet of six trucks now provide our business with a steady cash flow of \$8,300 per month. Our 2022 rate of return on our initial investment was 5.1%.

Green Truck provided us with all the management tools and licenses we need to successfully direct and develop our trucking business. We track the work of our fleet with GPS. We have access to current freight rates for all areas of the U.S. We operate our business out of the Green Truck Deployment Center in Bellingham, WA.

We engaged Green Truck to provide us with professional assistance to solve business problems unique to the trucking industry. When our fleet members have difficulties with insurance or warranty claims, our Green Truck professionals help navigate their claims. When fleet members have financial or banking problems, our Green Truck professionals immediately reach out to provide guidance and assistance. When we need to dispose of trucks or add new trucks and fleet members to our fleet - Green Truck is there to help us.

We are very pleased with our decision to invest in Green Truck Zhang, LLC and reside in the U.S. to manage our trucking business with an E2 visa.
