

I recently wrapped up an investment in the Green Truck Growth Fund. I received a 12.4% return on my investment. The group of people I worked with at Green Truck were professional and I enjoyed working with them. They provided good and useful information along the way. My exit from the fund was very easy. I was happy to take part in an investment fund whose mission is to help America's truckers replace older polluting trucks with newer emissions compliant trucks, while at the same time creating jobs in the Pacific Northwest.
