Green Truck was founded in 2014 to help deploy reduced-emissions heavy-duty trucks across the United States with immigrant investor funding.

Heavy-duty trucks are the lifeblood of the American economy. Both drivers and trucks are in high demand as supply chains struggle to cope with a resurging market. Our experienced team helps vet, fund, and deploy truck drivers by financing emissions-compliant trucks. Truck drivers on average run 100,000 miles a year, creating a significant economic impact with shippers, fuel, maintenance, etc.

Through our proven program, each truck driver is a direct job and creates indirect jobs through its operations. Green Truck fleet stimulates the economy, creates jobs, relieves the supply crunch, and helps our investors earn and immigrate.
